Amendments to the Claims:

The following listing of claims replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A foldable water tank, comprising:
 - a) a foldable receptacle having a bottom wall and vertical sidewalls, said sidewalls being inclined inwardly; [[and]]
 - b) a plurality of support structures connected to said sidewalls to support said sidewalls in the inclined position when said receptacle is empty[[]];
 - c) each of said support structures including first, second and third members pivotally joined at their first ends;
 - d) said members having a storage position wherein said members are adjacent each other and a deployed position wherein said members are spread apart from each other to form acute angles between each other at said first ends; and
 - e) a first brace removably connected to said first and second members, and a second brace removably connected to said first and third members thereby to make said first member vertically and rigidly secured when deployed.
2. (Original) A foldable water tank as in claim 1, wherein said support structures are disposed within said receptacle.

- 3 -

3. (Withdrawn) A foldable water tank as in claim 1, wherein said support structures are disposed outside said receptacle.

4. (Original) A foldable water tank as in claim 1, wherein:
a) said receptacle is substantially a truncated pyramid having a plurality of upper corners; and

b) each of said support structures is connected to a respective said upper corner.

5. (Currently amended) A foldable receptacle as in claim 1, wherein:

a) ~~said each of said support structures includes a vertical member~~ said first member is inclined inwardly toward the interior of said receptacle; and

b) a clip disposed at an upper end of said ~~vertical~~ first member to hook into an opening in said sidewall.

6. (Currently amended) A foldable receptacle as in claim 1, wherein said members are ~~support structures include~~ tubular ~~members~~.

7. (Canceled)

8. (Currently amended) A foldable water tank as in claim 1 ~~[[7]]~~, wherein:

a) said first member is inclined vertically when deployed~~[[,]]~~

b) ~~first brace connected to said first and second tubular~~

~~members, and~~

~~e) second brace connected to said first and third tubular members.~~

9. (Currently amended) A foldable water tank as in claim 6 [[8]], wherein:

a) said first and second braces are pivotally connected to said second and third tubular members, respectively; and

b) said first and second braces are removably secured to said first tubular member.

10. (Previously presented) A foldable water tank as in claim 1, wherein said receptacle has an open top.

11. (Original) A foldable water tank as in claim 1, wherein said receptacle includes an outlet or inlet flange.

12. (Currently amended) A foldable water tank as in claim 1 [[7]], and further comprising:

a) a bag configured to be carried by a person; and

b) said receptacle when folded and said support structures in said storage position are configured to fit inside said bag.

13. (Currently amended) A foldable water tank as in claim 5, wherein:

a) said receptacle includes a plurality of sleeves; and

b) said ~~vertical~~ first member of each support structure

- 5 -

is received within a respective sleeve.

14. (Currently amended) A foldable water tank, comprising:

a) a foldable receptacle having a bottom wall and vertical sidewalls, said sidewalls being inclined inwardly; [[and]]

b) a plurality of support structures removably connected to said sidewalls to support said sidewalls in the inclined position when said receptacle is empty; [[and]]

c) each of said support structures including a vertical member secured to a base, said vertical member being inclined in the direction of the respective sidewall ~~said sidewalls~~; and

d) said vertical member having a rigid and non-rotatable configuration when secured to the respective sidewall.

15. (Currently amended) A foldable water tank as in claim 14, wherein said support structures [[are]] include tubular members.

16. (Original) A foldable water tank as in claim 14, and further comprising means for folding said support structures into a compact configuration.

17. (Original) A foldable water tank as in claim 14, wherein said support structures are disposed within said receptacle.

18. (Withdrawn) A foldable water tank as in claim 14, wherein said support structures are disposed outside said receptacle.

19. (Currently amended) A foldable water tank, comprising:

a) a foldable receptacle having a bottom wall and

- 6 -

vertical sidewalls, said sidewalls being inclined inwardly; and

b) rigid and non-rotatable means for supporting said sidewalls in the inclined position when said receptacle is empty.

20. (Currently amended) A foldable water tank, comprising:

a) a receptacle having a bottom wall and vertical sidewalls, said sidewalls being inclined inwardly; [[and]]

b) said receptacle having a folded and rolled configuration when not in use; [[and]]

c) a plurality of ~~collapsible~~ support structures to support said vertical sidewalls when said receptacle is empty; and

d) said support structures having a rigid and non-rotatable configuration when deployed to support said vertical sidewalls during use and a collapsible configuration for storage.
